Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Indels
                                                                                                                                                                    Indels
                                                                                                                                                                                                                                                                                                                                   US-08-707-793A-3

US-08-707-793A-3

Sequence 3, Application US/08707793A

Patent No. 5776696

GENERAL INFORMATION:

APPLICANT: SALOWE, SCOTT P.

TITLE OF INVENTION: A HIGH THROUGHPUT ASSAY USING

TITLE OF INVENTION: FUSION PROTEINS

NUMBER OF SEQUENCES: 17

CORRESPONDENCE ADDRESS:

Patent No. 635893

GENERAL INFORMATION

APPLICANT: Vie, Henry

APPLICANT: Corley, Neil C.

APPLICANT: Guegler, Karl J.

APPLICANT: Guegler, Karl J.

APPLICANT: Baughn, Mariah R.

TITLE OF INVENTION: CELL SURFACE GLYCOPROTEINS

TITLE OF INVENTION: CELL SURFACE

CURRENT APPLICATION NUMBER: US/09/470,946

CURRENT APPLICATION NUMBER: US 09/187,331

EARLIER APPLICATION NUMBER: US 09/187,331

SEARLIER FILING DATE: 1998-11-06

NUMBER OF SEQ ID NOS: 6

SOFTWARE: PERL PROGRAM

SEQ ID NO 4

LENGTH: 1438
APPLICANT: Guegler, Karl J.

US-09-122-991A-6817/C
Sequence 6017, Application US/09252991A
Patent No. 6551795
GENERAL INFORMATION:
APPLICANT: Marc J. Rubenfield et al.
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO PSEUDOMONAS
TITLE OF INVENTION: ARRUGINOSA FOR DIAGNOSTICS AND THERAPEUTICS
FILE REPERBRACE: 107196/136
CURRENT APPLICATION NUMBER: US/09/252,991A
CURRENT FILING DATE: 1999-02-18
PRIOR FILING DATE: 1998-02-18
PRIOR FILING DATE: 1998-07-27

Sequence 5493, Application US/09489039A
Faceta No. 6610836
Patent No. 6610836
Faceta INFORMATION:
APPLICANT: Gary Breton et. al
TITLE OF INVENTION: NUCLEIC ACID AND AMINO ACID SEQUENCES RELATING TO KLEBSIELLA
TITLE OF INVENTION: PNEUMONIAE FOR DIAGNOSTICS AND THERAPEUTICS
FILE REFERENCE: 2709.2004001
CURRENT APPLICATION NUMBER: US/09/489,039A
CURRENT FILING DATE: 1999.01-29
PRIOR PLILING DATE: 1999.01-29
PRIOR PLILING DATE: 1999.01-29
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Sequence 1, Application US/09434354
; Sequence 1, Application US/09434354

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Sequence 87, Application US/09621976

Patent No. 6639063

GENERAL INFORMATION:
APPLICANT: Dumas Milne Edwards, J.B.
APPLICANT: Jobert, S.
APPLICANT: Giordano, J.Y.
TITLE OF INVENTION: ESTS and Encoded Human Proteins.
FILE REFERENCE: GENSET. 054PR2
CURRENT APPLICATION NUMBER: US/09/621,976
CURRENT APPLICATION NUMBER: US/09/621,976
CURRENT FILING DATE: 2000-07-21
NUMBER OF SEQ ID NOS: 19335
SOFTWARE: Patent.pm
LENGTH: 674
TYPE: DNA
TYPE: DNA
CORGANISM: Homo sapiens
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Query Match
